SUBJECT 1984 Annual Safety &
Housekeeping Inspection

REFERENCE

TO : G. L. Tromblee

SHAC recommends that Texas City and Chocolate Bayou exchange inspectors for the 1984 Annual Safety and Housekeeping Inspection. This type of exchange would provide outside evaluations for a reasonable cost. The inspection would last four days. The only external activity would be a dinner meeting the evening before the inspection to acquaint the inspectors with the plant's safety program and performance. An inspection booklet would be prepared and sent to the inspectors prior to the inspection to help acquaint them with the plant. The booklets would be of the type that could be printed within the plant, i.e., no pictures, etc.
