Matt:

Thanks for all of efforts on behalf of the Shanghai Health Study. It is an important project for all of the sponsors and you have provided needed support and clarity, particularly on matters concerning communications (internal and external).

Best wishes for success in your new assignment.

(Note I may want to talk to you sometime soon about air toxics regulations in the US)

Be well

Stuart

Shanghai Health Study Update

Announcements:

* During the February 21st meeting at API, it was agreed that a July, 2006 SHS Workshop will be organized and will take place in Denver, Colorado. More details to follow.

* The Technical Budget Subcommittee has agreed to organize a conference call during the month of March. More details to follow.

* Trisha Perkins has been announced as Lynn Russo's replacement on the BHRC Communications Committee. Welcome Trisha!

* Updated rosters reflecting the recent staff changes will be circulated to the appropriate committee members and posted on the respective committee page on the website.

As you may or may not know, I have begun a new position at API as a regulatory analyst specializing in air toxics issues. My transition to my new responsibilities has neared completion and I will no longer be working with the Shanghai Health Study. We, at API, have developed a plan to ensure that my responsibilities continue without interruption. I greatly appreciate the opportunity working with each and every one of you and I wish you all great success, personally and professionally, in the future.

Kindest regards,

Matt
