

December 21, 1976

TO: Asbestos Study Committee

SUBJECT: Ballot on recommended procedures for brake servicing.

This is to advise the committee that its members unanimously supported recommending to the Board of Directors that an insert be made in the Institute's catalogs on recommended procedures for brake servicing. Further, the committee unanimously favored the one page write-up that was enclosed with the ballot "Recommended Procedures for Reducing Asbestos Dust During Brake Servicing."

All committee members voted (5-0). Dr. Jacko did not vote, having resigned from the committee this past fall as he was being transferred to Europe on a temporary assignment.

This subject will now be reviewed by our Data Book and Technical Committee before forwarding recommendations to the Board of Directors. One member added these comments:

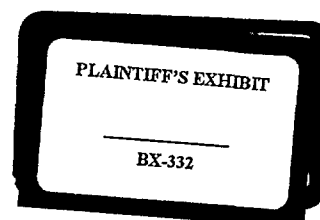

PRINTING A PAGE IN THE FMSI CATALOGS STILL DOES NOT GET PROCEDURES INTO THE HANDS OF THE GARAGE MECHANIC.

THE IDEAL SOLUTION IS FOR REBUILDERS OR OTHER PEOPLE PUTTING LINING SETS INTO INDIVIDUAL BOXES TO INCLUDE A FOLDED 8-1/2 x 11 SHEET ON PROCEDURES IN EACH BOX.

THE DRAWBACK OF COURSE IS SEVERAL PENNIES COST.

The foregoing is for your information.

E. W. Drislane
