MCL Aroclor Process
Improvement Plan

Mr. L. C. Fuhrmeister
ANNISTON PLANT

Lou:

Please have the attached process improvement plan reviewed thoroughly by Anniston personnel and returned to me promptly with comments by March 30.

As you know, we are being required to support our member companies activities on common products management aggressively as part of our worldwide responsibility. Consequently, it is very important that our input to review such as this be of high quality and done promptly.

Homer C. Carder
