Mr. Jack T. Garrett
Industrial Hygiene
Monsanto Chemical Co.
800 North Lindbergh Blvd.
St. Louis 66, Missouri

Dear Mr. Garrett:

One of our plants is interested in Pydraul F-9 and Pydraul 150 and have directed an inquiry to us concerning these products. We are familiar with Pydraul F-9 but have no information on the 150 material. I understand that Monsanto manufactures the latter product but that it is marketed by Socony Mobile Oil Co. From what our Materials and Process Engineer has been able to ascertain, Pydraul 150 is a chlorinated material and bears a caution in regard to inhalation and skin contact hazards.

We would appreciate any general information concerning the composition and properties of Pydraul 150 that might help us in evaluating it from an industrial hygiene point of view.

Very truly yours,

WESTINGHOUSE ELECTRIC CORPORATION

George N. Stewart
