18th December 1961.

Dr. Robert A. Kehoe, M.D.
Director: The Kettering Laboratory,
College of Medicine,
Eden Avenue,
Cincinnati. 19. Ohio. (U.S.A)

Dear Sir,

I sincerely thank you for your letter dated 4th December 1961 and for the pains taken by you to study my problem and for the detailed reply. I am confident this letter will prove of utmost help to me.

I am making the necessary arrangements to get the sample of air analysed locally and will also get some of my employees (who have been doing this work constantly since last 15 years) medically examined to find out the lead content in the blood and urine.

I can assure you that we take utmost care as regard cleanliness, ventilation, washing facilities etc. If possible, I will introduce a system of cleaning the dust with the help of industrial vacuum cleaners also.

I have just today received a letter from the office of H.M. Inspectorate of Factories, London, which also is on the same lines as indicated by you.

Thanking you, once again, I remain,

Sincerely yours,

G. D. Modi
Factory Supt.
