R. Emmet Kelly, M. D.
Medical Director
Monsanto Company
St. Louis, Missouri

Dear Dr. Kelly:

Thank you very much for your letter of August 26, regarding the toxicity of Pydraul F.9 fluid.

The laboratory tests we have conducted have also proved the non-toxicity of the product, thus confirming what you have said. Nevertheless, we had had no experience on the subject of long term toxicity, and I am pleased to note that you have experienced no toxicity among the employees at the manufacturing plant, who for many years have been exposed to the vapors and aerosols of this fluid throughout the working day.

Very truly yours,

INSTITUT NATIONAL DES MINES

Regional Director of Mines
Managing Director of the I.N.M.

E. Demelanne
