Re: Gaskets using P.S. #108 Commercial Asbestos Paper

Can you supply me with about six gaskets (maybe two each of three different parts) or fire rings that use the P.S. #108 thin white commercial asbestos paper in one form or another. This could be plain or on core. I would like to have some small parts that could be placed in a brown envelope.

The whole purpose is to send them to our potential source for the P.S. #109 asbestos-free version of paper (Celotex) so they can see what type of things we do with this material.

Thanks for your help.

J. A. Ulrich

Gary – Have you been able to get me a few parts using P.S. #108 paper yet?
Thanks, Jall
