Bell Laboratories

PLAINTIFF'S EXHIBIT

ATT-105

subject: Hazardous Material
Asbestos and Transite Products

date: April 7, 1976

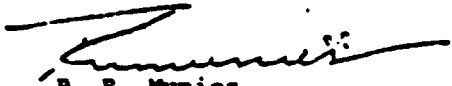

from: R. E. Munies

To All Buying Personnel:

The Occupational Safety and Health Act requires protection of employees from exposure to asbestos and transite products. Our Environmental Health and Safety Department has requested that products containing such materials be eliminated from stock and treated by Purchasing as an item with recognized health and safety hazard potential as specified in G.E.I. 8.1, Supplement B.

Accordingly, effective immediately, all requisitions containing subject materials or thought to contain subject materials, if not certified by the Environmental Health and Safety Department upon receipt in Purchasing, should be forwarded to Mr. W. J. Schreibeis, MH-3A-209 for evaluation and certification before a purchase order is placed.
