Dear Customer:

We are contacting your firm as a user of one or more of the Therminol FR® series heat transfer fluids. The Therminol® FR series includes Therminol® FR Lo-Temp, Therminol® FR-0 and Therminol® FR-1. As indicated on the labels attached to the containers, the Therminol® FR series contains polychlorinated biphenyls (PCB) of various types.

As you are undoubtedly aware, the PCB concentration in our environment has increasingly come under the scrutiny of various governmental agencies and scientific laboratories. In some studies, certain PCBs have been found to be persistent, an environmental contaminant and, possibly, injurious to certain forms of bird, aquatic and animal life. Accordingly, it is very important that PCBs be kept out of the food chain.

We would like to take this opportunity to remind your firm of the extreme care that must be taken by all users of PCB-containing products to prevent any entry into the environment through spills, leakage, use, disposal, vaporization or otherwise. Some specific applications where the use of the Therminol® FR series should definitely be avoided are in heat transfer systems involving food or food-related products, animal feeds, pharmaceutical products, packaging materials involving any of those items, and buildings where any of those items are manufactured or stored.

If your system involves food, feed, packaging or any of the other mentioned applications or if your system is such that entry into the environment cannot be prevented, ~~then we urge you to~~ you should immediately replace the Therminol® FR series with heat transfer fluids which do not contain PCB, such as Monsanto's Therminol® 55 or

Therminol®66. ~~Would you~~ Please contact your Monsanto Fluid Specialist if you determine that the Therminol® FR fluids should be replaced.

We recommend that you give very careful study to eliminating any possibility that the Therminol® FR fluids in your systems may reach the environment. For your reference we are enclosing a copy of our technical bulletin entitled "How To Keep Your Therminol FR System Leak-Free"; that bulletin includes the shipping instructions for return of Therminol® FR fluids to Monsanto for incineration.

Sincerely,

J. R. Fallon.
