Administrator Zeldin,

I wanted to forward an electronic copy of a letter from ACC’s President and CEO suggesting the withdrawal of 18 proposed regulations.

The proposed significant new use rules from the Biden administration detailed in the attached letter and further attachments have and will continue to impede new innovations in advanced recycling projects which is a viable way to address plastic pollution and waste. Without these proposed regulations, re-manufacturing plastic through advanced recycling – instead of simply wasting it – strengthens our domestic supply chain, creates jobs, and reduces our environmental footprint. Withdrawing these regulations represents an opportunity for the U.S. to lead and will be a substantial step helping comply with Executive Order 14192, *“Unleashing Prosperity Through Deregulation.”*

We appreciate the consideration and the opportunity to work with the Agency to answer questions about this information.

Thank you,

Ryan Jackson
