Real Aroclor

1 Environmental Problem — what is it from Aroclor standpoint

Points to Make with Westinghouse

1. Expertise
2. Effort
3. Biodegradation 1016 more biodegradable than 1242
4. Packing studies — conclusions
   level of 1242 to see effects
   Feeding
   Residue Studies

Points to Make With Westinghouse

1. Aroclor environmental problem.
   1254 — why found? Aroclor compositions
   process source
   stability etc.
2. Expertise and Effort — Techniques — General — Filtration EC/GC GC/MS
   Analytical Program — Role — Objectives
   Monsanto
3. Biodegradation —
   How best demonstrate Aroclor products are biodegradable.
   — 1016 & 1242 ?
4. Feeding / Residue Studies
   Objectives — results.
