November 11, 1983

Mr. Paul Rich
Atlantic Research
7511 Wellington Rd.
Gainesville, VA 22065

Dear Mr. Rich:

Enclosed is the only reference material relating to sales, usage and return of Therminol® Heat Transfer Fluids at your company location.

As we discussed, I interpret this to say that two quantities (100 gallons and 450 gallons) of Therminol FR-1 fluid were probably purchased for your location. Subsequently, at a later date, two quantities of material were probably returned to Monsanto during our recall program (4 x 55 gallons and 2 drum lots).

These are old notes of a market manager for this product from the years 1971-1972 and this is the best translation I can make from this sheet.

Items related to Atlantic Research are highlighted in red. The remainder of the data refers to other customers whose names I marked out to preserve their confidentiality.

If I can be of further assistance, let me know.

Sincerely,

John H. Craddock
Product and Environmental
Safety Director
