Asbestos Bag Use Audit

Audit conducted 4/25/86 by M.E. Knopp and J.K. Corrie in response to report that asbestos insulation bags were being improperly used; i.e., contain material other than asbestos insulation.

Findings:

1.) North of Bldg. 303 – 3 bags of asbestos insulation beside roadway. Bags removed 4/25 and portable tub placed in "C" zone to receive bags in the future.

2.) South of Bldg. 152 – 1 bag of non-asbestos insulation in asbestos bag. Asbestos bag was turned inside-out. Insulation was rebagged 4/25 and asbestos bag placed in asbestos dumpster. Zone insulator was reminded that this is improper use of asbestos bags.

3.) South of Bldg. 156 – Several bags of asbestos insulation beside roadway. Removed 4/25.

Our audit does not indicate a widespread misuse of asbestos bags.
