Subject: Region 4 question

Dear Sir or Madam:

I am a freelance reporter covering US Nitrogen, a chemical firm in eastern Tennessee (Green County). The company has reported an equipment failure on April 11 led to the release of 45.2 pounds of ammonia gas. The company states that this is not reportable under CERCLA. Does EPA agree with that? Is EPA looking into this? The company says it informed EPA of this incident. Is that correct?

Thanks,

Wally Roche
