

RECOMMENDATIONS

OSH 119 - Section 3 is hereby amended to include vinyl chloride.
It must be registered with the Department of Labor by July 1, 1974.

1910.93 and 1926.55 are hereby amended as they relate to vinyl chloride as follows: The present "ceiling value" of 500 ppm is to be changed to 75 ppm with a time weight average (TWA) or threshold limit value (TLV) of 50 ppm. Situations where workers are exposed to levels in excess of 200 ppm without proper protective equipment shall be considered to constitute an eminent danger.
