

1 Q Did you see at any time between the years
2 1946 and 1951 Doctor Gardner's proposed monograph on
3 asbestosis dated February 1943?

4 A No. I don't think I saw that.

5 Q Have you seen that recently?

6 A No.

7 Q You were not provided with a copy of
8 Doctor Gardner's written observations with respect to
9 both the King's Float studies and the human asbestos
10 disease cases that he was examining for asbestos
11 companies?

12 A No.

13 Q You never have seen that --

14 A No.

15 Q -- to this day?

16 A Not that I recall.

17 Q At any time between 1946 and 1951, did you
18 learn that Doctor Gardner had reported and written
19 that there was an excess incidence of tumors in a
20 certain strain of animals exposed to King's Float?

21 A Yes.

22 Q When did you learn that?

23 A Well, it would have been during the time
24 that we were summarizing those experiments to write
25 up the report.
