

SHERWIN-WILLIAMS PRODUCTS

SHERWIN-WILLIAMS

A strictly pure white lead ground in strictly pure refined linseed oil and is actually finer in texture than any other white lead on the market. ODP White Lead is soft in the package and easy to work up, yet it preserves a covering capacity and a wearing consistency which is unexcelled. ODP White Lead is of the same high quality that is found in every other Sherwin-Williams product, whether it be a paint, varnish, stain or enamel.

ODP White Lead is put up in strong steel kegs that keep out the moisture and air and do not absorb the oil, hence the lead is always fresh and in as good condition as when it left the mill. When empty, the steel packages are easily cleaned and may be put to many different uses in the paint shop or around the house.

ODP White Lead is also available in soft paste form in 12½ and 25-lb. pails and 50 and 100-lb. kegs.

Old Dutch Enamel

"Beats the Dutch for Whiteness"

Here we have an enamel equal in every sense of the word to the best imported enamel. There is no other enamel made in America today that possesses the same high qualities of many of the imported enamel in durability and appearance. Old Dutch Enamel is not a varnish enamel and consists only of the highest quality finely ground zinc—ground in processed linseed oil. For this reason Old Dutch Enamel will not turn yellow with age nor "alligator" like varnish enamel. This is one of the nicest enamels to apply as it flows remarkably free, does not "set up" quickly and can be worked over large panels without showing laps or streaks. Old Dutch Enamel comes in three shades: White, Ivory, and French Gray, approved and selected by the nation's leading architects and decorators. It is supplied in two finishes—gloss and eggshell. Old Dutch Enamel can be used for both interior and exterior work.

For undercoats use S-W Flat-Rite, for interior surfaces, the very finest enamel undercoater manufactured. On exterior surfaces use SWP Flat White.
