

LEAD INDUSTRIES ASSOCIATION

Graybar Building, 420 Lexington Avenue
New York, N. Y.

June 12, 1933

TO MEMBERS OF THE LEAD INDUSTRIES ASSOCIATION:

Upon the enactment of the National Industrial Recovery Act, it is expected that our industries may be invited to cooperate with the Federal Government. In that event, the Lead Industries Association, embracing as it does both producers and consumers of lead, will probably become voluntarily organized into divisions or committees, representing each lead industry and which will provide every unit with ample latitude to work out its best method of cooperation.

We are planning to act for all those industries heavily represented in our Association, namely, lead mining, smelting, refining, also white lead, red lead, litharge, pipe, sheet, solder and lead alloy manufacture and others, in complying with the provisions of the National Industrial Recovery Act. The Lead Industries Association is the logical agency to act for the numerous branches of the lead industries, and through it our closely allied industries can gain the strength which comes from the combined efforts of all.

A meeting of your Board is being held on Thursday, June 15th, and you will be kept promptly and fully advised of any official action taken by your Association and how it is planned to represent your interests in any machinery established to cooperate with the Government.

Sincerely yours,

F. E. Worman
Secretary.
