A Yes. The same job he done it over there, we done it over here.

Q All of that work would have included tune-ups, for example, and engine work?

A Everything. He built up engine. He did everything.

Q And throughout your time at Foreign Motors, whether it is at 25th Street or the Bel Air Road, did you ever see any warnings on any boxes of brakes or clutches about the dangers of asbestos?

A No.

Q Did you ever see any writing on boxes of brakes that said do not grind?

A To be honest with you, no, because when I took the box out, I saw Chevy, I saw Ford. I pulled it out, put it back on it, see if it fit, put it back together, and that is all.

We don't know before what is this asbestos or asbestos, whatever this is.

Q Thank you, very much, Mr. Grossblat. That is all of the questions I have now.
