Dr. R. A. Kehoe
Kettering Laboratory
College of Medicine - Ellen Avenue
University of Cincinnati
Cincinnati 19, Ohio

Dear Dr. Kehoe:

The first laboratory testing of the group of employees participating in the Methyl study has been completed. We are now ready to proceed with the second or recheck of urine specimens.

As our supply of urine specimen bottles is depleted, we would appreciate it if you would forward a sufficient supply of them directly to the four Medical Offices listed below. The number of bottles required is designated below by the number of employees participating in each location.

L. E. Curtis, M. D., 225 Bush Street, San Francisco 20,
California -- 22 employees; 50

R. Dillon, M. D., 605 W. Olympic Blvd., Los Angeles 54,
California -- 31 employees; 65

A. E. Currier, M. D., Standard Oil Company of California,
W. O., Inc., Richmond Refinery Emergency Hospital,
Richmond, California -- 40 employees; 85

H. W. Prince, M. D., Standard Oil Company of California,
W. O., Inc., El Segundo Refinery Emergency Hospital,
El Segundo, California -- 4 employees. 10

As this recheck program will probably be performed two more times at three-month intervals, you may wish to triple the requested order, if feasible, instead of re-ordering each time.

Very truly yours,

L. E. Curtis
L. E. CURTIS, M. D.
