W. W. F. Shepherd, Esq.
Turner & Newall Ltd.
Spotland, Rochdale

Dear Mr. Shepherd:

Subject: Saranac Laboratory
Asbestos Dust Experiments

I have pleasure in finally sending you herewith a copy of the completed report entitled "Asbestos Pneumoconiosis" dated January 31, 1949, the work covering which was started about eleven years ago by the late Dr. Leroy U. Gardner and completed by Dr. Arthur J. Vorwald of The Trudeau Foundation, Saranac Laboratory.

In my opinion the report covering the effects of asbestos dust upon animals (other than human beings) is interesting and enlightening. I do hope that it will be helpful to the various divisions of the T&N Limited organization.

Yours very sincerely,

Keasbey & Mattison Company
