CITATION FOR SERIOUS VIOLATION*

Citation Number 1 Date Issued JUN 13 1973

EMPLOYER Georgia Pacific Corporation

ADDRESS (Street Bloomingdale Road

(City Akron State New York Zip 14001

An inspection of a workplace under your ownership, operation, or control located at above address and described as follows

Manufactures gypsum wallboard and jointing compound

has been conducted. On the basis of the inspection it is alleged that you have violated the Occupational Safety and Health Act of 1970, 29 U.S.C. 651, in the following respects:

Standard or regulation allegedly violated	Description of alleged violation	Date on which alleged violation must be corrected
29 CFR 1910.93a (b) Page 22142	Failure of the employer to maintain employee exposure to airborne concentrations of asbestos fibers below acceptable levels: 1) Concentrations below 5 fibers, longer than 5 microns, per CC, based on an 8 hour Time Weighted Average, 2) Concentrations, at any time, below 10 fibers, longer than 5 microns, per CC.	MULTI-STEP ABATEMENT (See Reverse Side of this Citation)

Area Director's Signature Chester C. Whteside

The issuance of a citation does not constitute a finding that a violation of the Act has occurred unless there is a failure to contest as provided for in the Act or, if contested, unless the citation is affirmed by the Occupational Safety and Health Review Commission.

RIGHTS OF EMPLOYEES

Any employee or representative of employees who believes that any period of time fixed in this citation for the correction of a violation is unreasonable has the right to contest such time for correction by filing a notice with the U.S. Department of Labor at the address shown above within 15 working days of the receipt by the employer of notice of proposed penalty or notice that no penalty is being proposed.

"No person shall discharge or in any manner discriminate against any employee because such employee has filed any complaint or instituted or caused to be instituted any proceeding under or related to this Act or has testified or is about to testify in such proceeding or because of the exercise by such employee on behalf of himself or others of any right afforded by this Act." Sec. 11 (c)(1) of the Occupational Safety and Health Act of 1970, 29 U.S.C. 651.

The law requires that a copy of the enclosed citation(s) "shall be prominently posted" in a conspicuous place "at or near each place a violation referred to in the citation occurred." It must remain posted until all violations cited therein are corrected, or for 3 working days, whichever period is longer.

[illegible] according to the Act "shall be deemed to exist in a place of employment if there is a substantial [illegible] serious physical harm could [illegible] from a condition which exists, or from one or more practices, [illegible] processes, which [illegible] employed or are in use, in such place of employment unless the employer [illegible] with the exercise of [illegible] diligence, know of the presence of the violation." Sec. 17(k)

MULTI-STEP ABATEMENT

I. Immediate Temporary Administrative Controls

Initiate immediate temporary administrative controls to prevent employee exposure to excessive asbestos dust concentrations by July 1, 1973. A Compliance Officer will determine if these temporary controls are preventing employee exposure.

(1) Provide U. S. Bureau of Mines approved respirators for all employees working within the joint compound dry mixing and pack out areas of the main plant. Continue the use of respirators until the installation of permanent engineering controls.

(2) Establish a complete respirator program in accordance with the provisions of the American National Standard Practices for Respiratory Protection Z88.2-1969.

(3) Establish a program for maintaining the joint compound dry mixing and pack out areas of the main plant in a clean, orderly and sanitary condition to prevent asbestos dust contamination of the air. This program will include utilizing sealed impermeable bags for the storage of waste asbestos.

(4) Provide employees with protective clothing that can be maintained in a sanitary and reliable condition from becoming contaminated with asbestos. In addition, provide employees with individual clothes lockers to prevent their personal clothing from becoming contaminated with asbestos dust.

(5) Establish a personal monitoring program to determine, at six month intervals, the concentrations of asbestos dust.

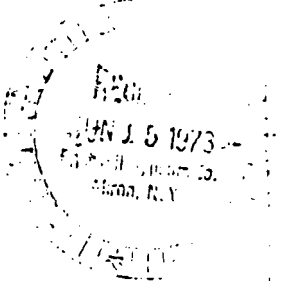

(6) Post asbestos "Caution" signs at all approaches to the work area to prevent unprotected persons from entering.

(7) Affix asbestos "Caution" labels on all raw materials, mixtures, scrap, waste, debris and other products containing asbestos to prevent exposure to asbestos dust.

II. Permanent Engineering and Administrative Controls

(1) By July 27, 1973, submit a plan for approval to the U. S. Department of Labor, Occupational Safety and Health Administration, 203 Midtown Plaza, 700 E. Water Street, Syracuse, New York 13210, Mr. Chester C. Whiteside, Area Director, showing a timetable for the installation of engineering controls to prevent employee exposure to asbestos dust concentrations above allowable limits.

(2) Incorporate items (3) through (7) (listed as temporary administrative controls in Part I) as permanent administrative controls to prevent employee asbestos dust exposure.

"No person shall discharge or in any manner discriminate against any employee because such employee has filed any complaint or instituted or caused to be instituted any proceeding under or related to this Act or has testified or is about to testify in such proceeding or because of the exercise by such employee on behalf of himself or others of any right afforded by this Act." Sec. 11 (c)(1) of the Occupational Safety and Health Act of 1970, 29 U.S.C. 651.

The law requires that a copy of the enclosed citation(s) "shall be prominently posted" in a conspicuous place "at or near each place a violation referred to in the citation occured." It must remain posted until all violations cited therein are corrected or for 3 working days, whichever period is longer.

* Alleged violations covered by this citation are those which are not serious violations within the meaning of the Act but which have a direct or immediate relationship to occupational safety and health.

MULTI-STEP ABATEMENT

I. Immediate Temporary Administrative Controls

Initiate immediate temporary administrative controls to prevent employee exposure to excessive asbestos dust concentrations by July 1, 1973. A Compliance Officer will determine if these temporary controls are preventing employee exposure.

(1) Provide U. S. Bureau of Mines approved respirators for all employees working within the joint compound dry mixing and pack out areas of the main plant. Continue the use of respirators until the installation of permanent engineering controls.

(2) Establish a complete respirator program in accordance with the provisions of the American National Standard Practices for Respiratory Protection Z88.2-1969.

(3) Establish a program for maintaining the joint compound dry mixing and pack out areas of the main plant in a clean, orderly and sanitary condition to prevent asbestos dust contamination of the air. This program will include utilizing sealed impermeable bags for the storage of waste asbestos.

(4) Provide employees with protective clothing that can be maintained in a sanitary and reliable condition from becoming contaminated with asbestos. In addition, provide employees with individual clothes lockers to prevent their personal clothing from becoming contaminated with asbestos dust.

(5) Establish a personal monitoring program to determine, at six month intervals, the concentrations of asbestos dust.

(6) Post asbestos "Caution" signs at all approaches to the work area to prevent unprotected persons from entering.

(7) Affix asbestos "Caution" labels on all raw materials, mixtures, scrap, waste, debris and other products containing asbestos to prevent exposure to asbestos dust.

II. Permanent Engineering and Administrative Controls

(1) By July 27, 1973, submit a plan for approval to the U. S. Department of Labor, Occupational Safety and Health Administration, 203 Midtown Plaza, 700 E. Water Street, Syracuse, New York 13210, Mr. Chester C. Whiteside, Area Director, showing a timetable for the installation of engineering controls to prevent employee exposure to asbestos dust concentrations above allowable limits.

(2) Incorporate items (3) through (7) (listed as temporary administrative controls in Part I) as permanent administrative controls to prevent employee asbestos dust exposure.
