DATE: 1944 July 26

DOC#: SAR035

DOCUMENT DESCRIPTION: Confidential Letter from H.K. Sherry to Vandiver Brown RE Report by Dr. Gardner July 15th

Confidential

Asbestos, Que.
July 26, 1944.

Mr. Vandiver Brown
General Headquarters

Report by Dr. Gardner of Saranac
July 15th

Dr. Stevenson has been contacted, and in reply to yours of July 19th am able to report as follows.

Dr. Stevenson states that what he considered the most suspicious films were the ones inspected by Drs. Gardner, Robert, and Vestal, and further that they represented the entire group of employees - Mine, Mill and Factory. Particular attention was paid to a group of textile workers, females included.

Dr. Gardner has apparently made an error as regards using the word "Thetford". Dr. Stevenson reports on this item as follows:-

"I understood that he referred to our Asbestos films, and showed him the whole stack, and we concluded that the most convenient and economical way to get them there would be by truck. So there cannot be any question of Thetford or Asbestos. Thetford have no collection of stereoscopic films."
