

FROM C. W. Wright

DATE August 16, 1972

FOR Mr. W. M. Tomc - DPJ

CITY Cleveland

ANSWERING
LETTER OF

SUBJECT TRADE SALES BUY-OUTS
FDA
CHICAGO LEAD LAW
EXEMPT SOLVENT

cc: Mr. G. L. Bechtel
Mr. D. W. Eugene
Mr. J. D. Russell
Mr. E. L. Patton
Mr. W. J. Bennis
Mr. S. T. Howell - DPJ
Mr. R. J. Haviland - Central

This will up-date you on the status of the following items concerning compliance with the various lead laws:

<u>ITEM</u>	<u>LEAD</u>	<u>EXEMPT SOLVENT</u>
Y-700 Paste Wood Filler	OK	Unknown
- Y-1004 Spred Gloss Aerosol - Aluminum	OK	Not Applicable
- Y-1025 " " " - Coppertone	OK	" "
- Y-1045 " " " - Gold	OK	" "
- Y-1095 " " " - Acrylic Clear	OK	" "
- Y-4035 Spred Urethane Satin Sheen Varnish	OK	" "
- Y-5027 Insul-Blaze - Flat White	OK	Not Exempt
- Y-5028 " " - Semi-Gloss White	0.4%	OK
- Y-5254 Coal Tar Epoxy	OK	Unknown

I talked to Mr. Jenkinson of Ocean Chemical concerning Insul-Blaze 5027 and 5028. The 5027 Flat White does not contain any lead pigment or driers. He currently uses Varsol and claims he can't find an exempt version. The 5028 Semi-Gloss White currently has 0.4% lead and he doesn't seem to know how to get it down to the 0.06% level - solvent is exempt. He is going to return the FDA Guaranty to Mr. Patton.

NOTE - Chicago will have to be notified that they can't sell Y-5028. We'll have to keep on Ocean's back until they conform with the Y-5028 or else we drop the product by January 1974.

It appears we are in good shape on all buy-out concerning lead (except 5028 for 1974).

Please feed this information into your next report.
