

Dutch Boy Red-Lead is a fine, highly refined red-lead supplied in two forms—paste and liquid. The paste comes in natural orange-red, is readily mixed to brushing consistency and may be diluted to darker colors. Dutch Boy Liquid Red-Lead ready for the brush is available in the natural orange-red, two shades each of brown and green, and also in black.

RED-LEAD best for METAL PAINTING

... Saucer Test convinces Louisiana Highway Official

Before you buy it's easy to prove what paint gives iron and steel structures the most durable and economical protection.

Just make the "Saucer Test" and draw your own conclusions.

Mr. P. V. Pennybacker of the Louisiana Highway Commission did this and here is the verdict:

"I have used the test and have found decided comparative results. In fact I made several extra saucers and am looking at several points."

"I am perfectly satisfied with the dependability of the tests. Were I not convinced of the superiority of the Dutch Boy product before...I am now."

(signed)—P. V. Pennybacker.

Let us send you free the "Saucer Test" Kit. Includes a testing saucer and generous sample of Dutch Boy Red-Lead to test against any other paint you wish. See the evidence with your own two eyes...how pure red-lead gives greatest protection and saves money.

A free kit to TEST PAINT for railroad equipment

The way to test paint is to test the service it gives. Not the slow and expensive way—painting and repainting entire structures. A new way—the "Saucer Test". With it you compare the lasting qualities of two or more paints for metal—under approximate service conditions.

The "Saucer Test" will enable you to compare the durability of Dutch Boy Red-Lead with any other paint. It will prove that this pure red-lead matches how racing the conditions will protect your property better. In a long series of tests conducted by a leading southern railroad, the "Saucer Test" proved that pure red-lead outlasted the other paints tested as a primer 4 to 1.

It costs nothing to make this convincing test. We will gladly send you a free "Saucer Test" Kit, including a testing saucer, generous sample of Dutch Boy Liquid Red-Lead, set of instructions and a small booklet about metal painting.
