PLAINTIFF'S
EXHIBIT
GF-1128

Attached hereto, a prospectus issued by Thos. I. North, reference to United Asbestos - American Smelting & Refining operations.

We are all aware of the profitable operation of Lake Asbestos, but are deeply impressed with the thorough plans that they publish reference to continual improvement of product.

While this is a prospectus to interest investment capital, we are confident that the data is factual, and if so, one can visualize a continual improvement in quality of product, due to better screening and benefecation processing.

We should keep these principals in mind, when discussing our own operations.

Your comments will be appreciated.

Kuhlken

LAKE ASBESTOS DEPOSIT - BLACK LAKE, QUEBEC

The prospectus issued by Thos. L. North was most interesting. The ore beneficiation program they note is much like our own which was the subject of an approved I.A. and now awaiting receipt of equipment. I do not find reference to plans on improvement of the product itself and if you have additional specific information on this score would appreciate it.

D. L. NEIL
