Subject: American Coal Council thanks and invitation

Mandy,

Thank you so much for meeting with me today. I appreciated the conversation about coal policy and regulation in the context of the Trump administration and under the EPA leadership of Administrator Pruitt.

It was my pleasure to introduce the activities and programs of the American Coal Council to you. As mentioned, I extend invitation to your or another senior EPA representative to join us at our August conference to speak on the status of EPA regulations and regulatory reform relative to coal mining and use. I am pleased that that EPA is engaging with our industry again and our conference delegates would welcome this opportunity to hear from EPA personally

ACC's "Coal Market Strategies" conference will be held August 14-16, 2017 at the Stein Eriksen Lodge in Park City. It is typically attended by approximately 100-125 senior level executives from across the coal industry – suppliers, traders, transporters, consumers, and services and support providers. Our 2017 conference theme is "Charting the Course for Coal – 2017 and Beyond" and the program will address issues related to coal and energy markets, policy, regulation, and technology.

The conference general sessions will be held from approximately 8:30 am-4 pm on August 15th and approximately 8:30 am-Noon on August 16th. At this time, remarks by EPA could be accommodated either day. I expect the speaking slot to be either 30 or 45 minutes.

For reference and in the event you wish to forward/share this email, background information on the American Coal Council is below.

The American Coal Council (ACC) is a 501(c)(6) corporation in our 35th year of service to the coal industry. We focus on coal sector education, networking, and advocacy. With more than 150 member companies, the ACC is among the largest coal trade associations and represents the

collective business interests of the American coal industry. The strength and uniqueness of our association is derived from the membership which includes companies across the entire coal value chain – coal suppliers, consumers, traders, transporters, and services and support partners. We draw on this diversity to offer programs and services that address timely, critical issues in our industry.

ACC's Mission:

- To provide relevant educational programs, market intelligence, advocacy support and peer-to-peer networking forums to advance members' commercial and professional development interests.
- To support activities and objectives that advance coal supply, consumption, transportation and trading.
- To represent the collective interests of the American coal industry ~ from the hole-in-the-ground to the plug-in-the-wall ~ in advocating for coal as an economic, abundant and environmentally sound fuel source.
- To serve as an essential resource for industry, policy makers and public interest groups.

Thank you for consideration of this speaking invitation for EPA. I look forward to hearing back and am available at your convenience for any questions.

Regards, Betsy Monseu
