TECHNICAL BULLETIN, THE AROCLOR COMPOUNDS	3 M	2345	0.78
	4 M	2642	0.66
	→ 5 M	2935	0.58

Mr. J. S. Tobin
E-3-N

(Feb. 1961 - 3000 reprint
cost \$1826)

Confirming my request that you obtain quotations on reprinting 1,000, 2,000, or 3,000 copies of this technical bulletin by Mulligan, I am enclosing a copy of the bulletin with the following corrections indicated:

Cover -- Add the small capital R in a circle after the word Aroclor.

Page 1 -- Change the word thirteen in paragraph three line one to twelve.

Pages 2 & 3 -- Make indicated changes. The word (molten) in the row on color and the temperatures in parentheses in the row of typical density may be set in smaller type. Note that the gutter should be about $\frac{3}{8}$ of an inch wider on each side to prevent obliteration of the distillation range figures of Aroclor 1254 and Aroclor 1260. The space of the headline need not be changed.

Page 9 -- The subhead "Impregnating Compounds" should be moved down between the second and third paragraphs.

Pages 10 & 11 -- Indicated changes were made on the films on February 16, 1961.

Pages 15 -- In paragraph under "Liquid Sealant For Furnace Roofs" change 1221 to 1248.

Page 16 -- The indicated changes were made on the film shortly after September 28, 1961.

Page 21 -- Transpose the last two paragraphs.

Page 25 -- In the second subhead change the hyphen after rubber to a dash.

Mr. J. S. Tobin

-2-

April 23, 1962

Page 32 -- In the second paragraph delete P-149, PL-309,
and PL-311; and insert PL-306, PL-311, and PL-326.

Page 33 -- Remove the blob over cost in the second line of
the first paragraph.

Page 35 -- Insert an asterisk after Santomerse in the
last line of the third formulation.

Thank you very much.

L. S. Stone
