MODEL 53 Fully Automatic METERING PUMP BURNER

A revolutionary new heavy-duty burner built with a positive-displacement Metering Pump, a 3-Way Magnetic Oil Valve and a high efficiency Suction Pump. It will automatically maintain a fixed Air-Fuel Ratio regardless of variations in oil temperature and viscosity.

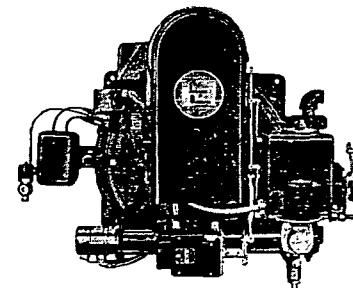

With the Model 53, operating and maintenance costs are kept at a minimum. Already this new Johnson Burner has established an international reputation for economy and faithful performance. The Model 53 will start readily and operate automatically even when the oil in tank and lines is cold and hard to pump.

It is available in 8 sizes ranging from 25 to 400 hp and from 3500 to 56,000 Sq Ft Steam Radiation, nominal ratings. Under good operating conditions, actual performance ratings are 25 percent greater than nominal ratings.

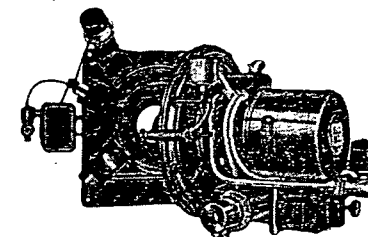

MODELS ILLUSTRATED HEREWITH
(From the Top)

FORCED DRAFT PACKAGE UNIT with Model 53 Oil Burner. This unit also available with a Gas Burner and with a Combination Oil-and-Gas Burner. A factory assembled unit in sizes to fit all standard type boilers. It cuts installation costs. Increases operating efficiencies greatly.

MODEL 53 with CONVENTIONAL DRIVE, the burner that has established new standards of Easy Starting and Economical Operation.

MODEL 53 with BELT DRIVE, for installations where Conventional Drive is unsuitable.

MODEL 53—COMBINATION OIL-and-GAS BURNER which produces fuel economies by offering a choice of fuels. Available with Automatic or Flip-Switch Changeover.
