

TRADE-MARKED

Identified LEAD PIPE!

DUTCH BOY SOLDER

When you buy Dutch Boy Solder, you can be sure of getting the same composition each time. Every bar, every ingot, is numbered to denote its grade. For example, Dutch Boy No. 111 is a guaranteed "half and half" (50% tin and 50% lead). There's a composition in the line for every soldering purpose including No. 888 for wiping.

Dutch Boy trade-mark and our name now stamped on all National Lead pipe. Correct weight per foot assured.

NOW—an easy way to recognize lead pipe of highest quality—lead pipe with proper wall thickness—with correct weight per foot. National Lead pipe is marked every 9½ inches throughout its length with our name and the Dutch Boy trade-mark. This stamped-in marking is your assurance of a uniform, dependable, standard product.

For years, the longest-lasting plumbing jobs have been lead pipe. Now, with this trade-marked, full-weight pipe you can be surer than ever of

doing work that is trouble-free. Lead pipe never rusts, never clogs with rust-scale. You can use smaller pipe, and still insure a permanent, adequate water supply.

Lead pipe is flexible. In installing it, you can string it like wire, and make bends without the use of elbows. It comes in any length you need—requires few joints to complete a piping system.

When you want to do a job that won't develop leaks or trouble—urge your customers to install lead pipe!
