Dear Mr. Nichols:

Your inquiry concerning Johns-Manville products containing crocidolite asbestos has been referred to me.

I would be very happy to comply with your request to provide you with a list of J-M products containing crocidolite. However, it would require review of approximately 1200 various products.

We use very little crocidolite in our production. Therefore, it would be advantageous for you to provide me with the names of our products purchased by your plant and I will gladly furnish the data you requested.

As a matter of curiosity, would you please advise me of your reason for seeking out products containing crocidolite asbestos?

We assume your inquiry is related to the potential toxicity of crocidolite asbestos. If this is so, perhaps we can provide you with additional information.

Thank you for your kind cooperation.

Very truly yours,

C. L. Shackle
