

very, pretty shipyard! Another that does not settle
 & make is just the monthly pick up in diesel gas
 is many below midwestern cities where cost is great.

In addition to lack of visibility
 some of the inhabitants have complained of some smoking
 although as yet I have been unable to trace it
 or trace it.

It is very feeling that if the
 automobile is a substantial contribution to
 the problem that we should find evidence
 of engine emissions poisoning but as yet we
 are not reported any of the symptoms of
 carbon monoxide poisoning & more.

Dear Mr. Keller -

I am now in Los Angeles
making a study of the so called Survey
situation with particular reference to the
in phone that automotive equipment may
have upon the problem.

The principal manifestation
of the problem that I can plainly see is
the smoke that affects visibility. It is a

L. S. Kline This is in charge of
Air Pollution Control. I have
talked to you about the problem
for help.

While ~~except~~ thus far
the fact that most of the smoke is
in sources other than autom
one party of them that I have ob
~~the~~ it and while as yet I
as my mind just what this is
I am writing you to ask what
it might be feasible to set up
at ~~the~~ the Kettering labora
atmospheric pollution in the el
perhaps to tie in with some of
of the toxicological effects of various
gas from automotive equipment
to do so.

As I say, I haven't yet ma
just what my recommendations
have completed my investigation, but
am inclined to think that perhaps
through the Automobile Manufacturers
to support a project of this kind in
the interest of getting factual data
against ~~possible~~ possible injury to pub

and sponsored anti drug legislation which
will passed the state legislature and seems
likely to about the middle of September.

It does think you might be
wiser to further discussion along this
line please let me know first by wire
to me at the hotel here and confirming
by letter I may office at Philadelphia in Detroit
Best regards

JM Campbell

P.S. I will be at this hotel until Aug 16, then
to St Francis hotel in San Francisco (I hope) then
back to Detroit about Aug 22.

in situations where the problem is
more psychological than physiological.
To be kind it is very easy to get the latter
not confused.

I showed this to a possibility
of a Philbrick who is a member of ~~the~~ a
very important various committee and then
