FOR Mr. S. T. Bowell - DPJ

CITY

cc: Mr. W. D. Kinsell, Jr.

ANSWERING
LETTER OF

Dr. H. J. Kiefer

Mr. E. B. Euchner - DPJ

Mr. W. M. Tomc - DPJ

Mr. J. E. Southwick - DPJ

SUBJECT LEAD REMOVAL

In follow up to the previous correspondence and your most recent letter of January 4th, we are approving your request for an extension on 1800-N, 1801-G, 5003-E, 1831-C and 1863-C formulas until June 30th at the .5 percent lead level to accommodate our drying systems.

It is to be understood that by that time, our further evaluations of alternate drying systems, primarily a combination cobalt and zirconium at appropriate levels will be finalized. There is one qualification that formulas of these products at the .5 level will have to be carefully monitored so that no plant services any of these materials that might arrive in the Chicago market.
