GENERAL OBJECTIONS

Union Carbide objects to the entire set of Plaintiffs' Interrogatories, Requests for Production and Requests for Admissions on the following grounds, which are hereby incorporated by reference in Union Carbide's responses to individual Interrogatories, Requests for Production and Requests for Admissions below:

GENERAL OBJECTION NO. 1:

Union Carbide states that trial preparation and factual investigation are ongoing. Union Carbide's answers to these Interrogatories, Request for Production and Request for Admissions are based on information known to Union Carbide at this time. Union Carbide reserves the right, however to make reference at the trial or at any hearing in this action to facts and documents not identified in these responses, the existence or relevance of which is later discovered by it or its counsel. By this reservation, Union Carbide does not in any way assume a continuing responsibility to update its responses to these Interrogatories, Request for Production and Request for Admissions, and specifically objects to each of these Interrogatories, Request for Production and Request for Admissions to the extent that they seek to impose any such continuing obligation upon Union Carbide.

GENERAL OBJECTION NO. 2:

Union Carbide objects to plaintiffs' Interrogatories, Request for Production and Request for Admissions in their entirety on the grounds that they are not reasonably framed in terms of the facts and subject matter of the present action, with the result that Union Carbide is called upon to speculate as to what information relevant to the present case, if any, may be deemed to fall within the scope of the Interrogatories, Request for Production and Request for Admissions as phrased.

GENERAL OBJECTION NO. 3:

Union Carbide also objects to all Interrogatories, Request for Production and Request for Admissions insofar as they would require the disclosure of information protected by the attorney-client privilege or work product doctrines.

GENERAL OBJECTION NO. 4:

Union Carbide objects to providing information about any asbestos-containing products which it has manufactured, sold or distributed, on the grounds that the asbestos fiber in those products was encapsulated by or embedded in other material and on the grounds that the plaintiff has made no allegation of exposure to those products. According to Union Carbide's best presently available information, these products consist of the following: a tree sprout inhibitor used primarily to inhibit growth on telephone poles; a phenolic molding compound used in electronic parts and products such as switches and radios; a thermoplastic molding material used primarily in camera cases; Prestone radiator products; acetylene cylinder liners; a scarfer machine; a heat exchanger; and, possibly, certain polyethylene and polystyrene or other products sold in very limited quantities or on an experimental basis. Union Carbide no longer manufactures any of the above products. Union Carbide acquired its Coalinga mine site in 1958. From 1960-1963, as Union Carbide developed its mining and milling operation, Union Carbide provided fiber samples to potential customers. From 1963 until June 30, 1985, Union Carbide mined and sold short fiber chrysotile asbestos initially as "Union Carbide Asbestos" and then under the trade name Calidria (some distributors marketed Calidria under other trade names). All responses to these Interrogatories, Request for Production and Request for Admissions refer to Calidria asbestos only.

GENERAL OBJECTION NO. 5:

Union Carbide objects to this entire set of Interrogatories, Request for Production and Request for Admissions to the extent that they call for information about Union Carbide employees or premises, or policies pertaining to Union Carbide employees or premises other than Union Carbide's Texas City, TX location. Inasmuch as the plaintiffs do not allege that they or their decedents were ever employed by Union Carbide or worked at any job site controlled by Union Carbide other than the Texas City, TX location, such information is irrelevant and immaterial to matters at issue in this case. Any pertinent information which the employee or premises information about other locations can be said to reflect can be requested directly without requesting the irrelevant and immaterial information or documentation about employees or premises.

PRELIMINARY STATEMENT

These responses are based on facts known to or believed by Union Carbide Corporation d/b/a Union Carbide Chemicals and Plastics, Inc., at the time of answer. Because much of the information is sought from many years ago and is therefore difficult or impossible to reconstruct or retrieve, we reserve the right to amend these responses as, and if, new or better information becomes available or if any error is discovered. the right of privacy, or (j) any other privilege. Objection to the extent the request seeks information not feasibly calculated to lead to the discovery of admissible evidence. REQUEST FOR ADMISSION NO. 8:

Admit that in 1950 Defendant was aware that airborne asbestos dust created a potential health hazard to those who breathed such dust.

RESPONSE: Denied. Union Carbide denies that it possessed awareness that dust of any type at sufficiently high levels could cause health hazards. Indeed, Union Carbide employed state-of-the-art practices and was recognized as an industry leader in efforts, including but limited to, safety practices in efforts to minimize or avoid dust inhalation by its or contract employees, including, but not limited to, safety practices, ventilation measures and information provision. Union Carbide's information about specific asbestos-related hazards, however, developed gradually. Union Carbide's involvement with asbestos was primarily as that of an industrial consumer. Union Carbide manufactured some products which had an asbestos content, and from 1963-1985, mined and sold a unique short-fiber chrysotile used for specialized, non-insulation purposes. Union Carbide never manufactured or sold asbestos-containing insulation. Accordingly, Union Carbide lacked any special knowledge or information of the insulation industry.

Union Carbide's knowledge concerning potential health hazards possibly associated with excessive asbestos fiber inhalation developed gradually. Sources of information as to possible health concerns of which Union Carbide is presently aware included general and scientific literature on the topic and reports or memoranda by Union Carbide employees. Upon the plaintiff's request, copies of such reports and memoranda, which Union Carbide has located, will be made available at a suitable time and place for review and duplication by the plaintiff.

Union Carbide recognizes that the excessive inhalation of asbestos fiber may be associated with the development of serious and potentially fatal disease. Union Carbide also understands that the onset and development of such disease in a person may be related to an affected by, among other factors: the particular type of fiber that is inhaled; cigarette smoking; and environmental conditions, in addition to the person's medical history and condition.

REQUEST FOR PRODUCTION NO. 11:

If you deny the foregoing request, in whole or in part, produce all documents supporting your denial.

Objection to the extent the request is overly broad, vague, ambiguous, unduly burdensome, unnecessarily expensive, harassing, and annoying. Subject to the foregoing objections and without waiving same, Defendant will supplement.

Objection to the extent the request seeks information not feasibly calculated to lead to the discovery of admissible evidence. Objection to the extent the request is overly broad, vague, ambiguous, unduly burdensome, unnecessarily expensive, harassing, and annoying. Subject to the foregoing objections and without waiving same, Defendant will supplement if Defendant has any documents in its possession pertaining to plaintiff's request.
