Ed Coleman called on November 16, 1977 to inform us that the local Celotex office informed Pioneer that the Celotex headquarters office located in Tampa, Florida has issued instructions to the effect that Celotex will no longer permit the application of the OSHA asbestos warning labels on their asbestos felt. The individual at the Celotex office who issued the instructions is Mr. E. F. Levin.

Flintkote will continue to apply the label which is pre-printed on the felt wrappers until such time as a new supply of wrappers is needed. Please call Mr. Levin and determine why instructions were issued to remove the warning labels.
