You'll find VARIETY-

The National Lead Company line includes, as this folder shows, a wide variety of lead, lead alloy and related products.

That's one kind of variety. But this famous line has another kind, too. For example, buyers of our sheet lead or lead pipe find five types to choose from. Solder customers can take their pick from a broad range of service proven alloys. Solder users are offered an assortment of shapes and compositions.

To you, as a metal buyer, this two fold variety of our line means one thing.

No matter how you use lead or its alloys... no matter how exacting your requirements... you will find we can supply you properly and promptly.

You'll find VARIETY-

The National Lead Company line includes as this folder shows, a wide variety of lead, lead alloy and related products.

That's one kind of variety. But this famous line has another kind, too. For example, buyers of our sheet lead or lead pipe find two types to choose from. Babbin customers can see they pick from a broad range of accurate proven alloys. Solder users are offered an assortment of shapes and compositions.

To you, as a metal buyer, this two-fold variety of our line means one thing.

No matter how you use lead or its alloys... no matter how exacting your requirements... you will find we can supply you properly and promptly.

SHEET LEAD

Whether you use sheet lead to line a tank, to build up roofing or some other purpose, your choice comes in just three steps to right the type, the weight, the quality.

To insure your getting the right type, we roll sheets from the following kinds of lead: common, standard, battery, industrial and industrial standard. For extra lead use, we also make a special type of sheet known as "weather" sheet lead.

To insure your getting the right weight, we roll the sheets according to your specifications. Any weight from 7 lb. per sq. ft. to 50 lb. per sq. ft. is available.

To insure your getting the right quality, we use only the finest metal, employ only thoroughly skilled craftsmen.

You'll find VARIETY.

The National Lead Company has at hand, on the folder shown, a wide variety of lead, lead alloy and related products. That's one kind of variety. But this folder has another kind too. For example, buyers of our sheet lead or lead pipe find two types to choose from. Bottom customers can see these products from a broad range of service proven alloys. Further more are offered an assortment of alloyed and compositions.

To you as a metal buyer, this two-fold variety of our lead means one thing. No matter how you use lead or its alloys, no matter how exacting your requirements, you can lead us to apply you properly and promptly.

SHEET LEAD

LEAD PIPE

But as there are many different values and processes concerned in the handling of water in various forms, so there must be many different weights and volumes of pipe with which to carry them.

For every size, we have been supplying lead pipe in standard sizes, with closely corresponding the standard sizes. In detail we have complete facilities for producing lead pipe in a broad range of sizes and wall thicknesses.

As to the size of sheet lead, we make pipe from round sheet of lead, annealed, standard, and various different compositions.

You can't judge the **QUALITY**
of Sheet Lead and Lead Pipe
- simply by looking at them.

All sheet lead and lead pipe look pretty much alike. But there may be important differences...in the purity of the lead...in the care used during manufacture...in the skill of the maker. These quality features do not show on the surface.

That's one reason why so many buyers come to National Lead Company for their sheet and pipe requirements.

Our quality standard is as well known as our products. We use only the finest metal obtainable. Our mills and presses are clean and kept clean to avoid contamination. Rigid inspection during production minimizes the possibility of mechanical defects. Constant checking insures correct gauge or wall thickness....

and QUALITY isn't all...

00057

NLI 113522

OUR SHEET AND PIPE COME IN
A WIDE **VARIETY** OF TYPES
AND SIZES TO FIT ANY **NEED**

TANK LININGS ... Sheet lead and flange are a necessity in many plants processing corrosive chemicals.

FOUL COILS ... Lead pipe coils are easy to handle and provide an economical and practical method of heating or cooling massive volumes.

A VARIETY OF TYPES

Sheet lead and lead pipe are used in a variety of ways, are subject to many different exposure conditions. To assist you in securing maximum service and satisfaction from your particular application, we manufacture sheet and pipe from several types of lead described briefly below. Our technical staff is ready at all times to supply you with additional information you may need to make your selection.

COMMON LEAD

Common lead is a non-ferrous pure lead used for roofing, tank and storage pipe lines to bond and protect.

CHEMICAL LEAD

Chemical lead is a special alloy containing lead and antimony for better resistance to the chemical and corrosive substances.

WATERPROOF LEAD

Waterproof lead is a special alloy of lead and antimony which is used for water tanks, roofs, and other structures where it is exposed to water and is the choice for such work.

ANTICORROSION LEAD

Anticorrosion lead is a special alloy of lead and antimony which is used for the protection of structures from the harmful effects of acids and other corrosive materials.

HEAVY DUTY ANTICORROSION LEAD

Heavy duty anticorrosion lead is a special alloy of lead and antimony which is used for the protection of structures from the harmful effects of acids and other corrosive materials.

CONCRETE-PROOF SHEET LEAD

Concrete-proof sheet lead is a special alloy of lead and antimony which is used for the protection of concrete structures from the harmful effects of acids and other corrosive materials.

SERVICE PIPING ... Lead does not rust, does not scale, and is easy to install. It is the choice for hot and cold water lines.

ACID PIPE LINES ... Lead pipe (all the) carries and resists corrosion and efficiently flows from acid tank through entire factory system.

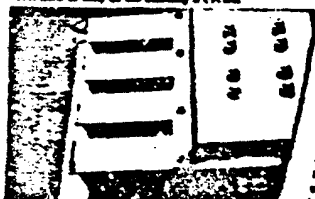

00057

NLI 113523

NOTICE: If the film image is less clear than this notice, it is due to the quality of the document being filmed

ROOFING... Lead is more resistant to atmospheric corrosion than any other or cheaper metal. A sheet lead roof lasts as long as the building it covers.

VIBRATION ABSORPTION... Lead "pads" (above) absorb shocks in building foundations. Sheets of lead and sheet lead (below) absorb sound.

A VARIETY OF SIZES

SHEET LEAD

Whether you wish to line a large acid chamber or a small storage tank, cover the walls of an X-ray room, or fabricate a shower stall pan, we can furnish sheet lead in a size and thickness exactly suited to your needs. We sell sheet lead in all thicknesses from 1/64" up and in any specified width and length up to 8'6" x 30'. Self-braced sheets are available on special order.

LEAD PIPE

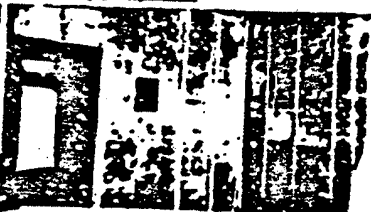

We possess one of the largest stocks of the sizes and grades used to make lead pipe in this locality. Our extensive inventory can be obtained with inside diameters ranging from 2" up to and including 8", and in any practical wall thickness. Larger pipe sizes can be fabricated on special order.

FLASHING... Lead is non-corrosive. Lead flashing does not corrode building elements in contact with it, easily replaces cracked or ruptured.

Come to LEAD HEADQUARTERS

The next time you are in the market for sheet lead or lead pipe, why not let us quote on your needs? You will find our range of types and sizes enables you to obtain sheet and pipe exactly suited to your requirements. You will find the quality of our products a positive assurance of long, trouble-free service.

X-RAY EQUIPMENT... Sheet lead used for wall and cabinet linings absorbs radiation as well as X-ray equipment.
