Dear Dr. Tucker:

Re: IBT No. B7009 - BTL-Aroclor II - 30-Day
Tissue Residue Study

The remaining rat tissues, urine and feces and samples of the test diets will be shipped to your attention on April 7, 1969. They should arrive in St. Louis at 11:47 a.m. via American Airlines Flight Number 571.

The urine and feces are identified as follows:

Group	Sex	Sample Number
100 ppm Halowax 1014	M	1
	F	2
300 ppm Halowax 1099	M	3
	F	4
1,000 ppm Halowax 1099	M	5
	F	6
50 ppm DDT	M	7
	F	8
300 ppm DDT	M	9
	F	10

Group	Sex	Sample Number
50 ppm Toxaphene	M	11
	F	12
300 ppm Toxaphene	M	13
	F	14
1,000 ppm Aroclor 5460	M	15
	F	16
300 ppm Aroclor 5460	M	17
	F	18
Control	M	19
	F	20

Rats of the Aroclor 1242, Aroclor 1254, Aroclor 1260 and 300 ppm Halowax 1014 groups were sacrificed prior to the notification to collect urine and fecal samples. These samples can, however, be collected from rats employed in the projected long-term feeding studies.

If you should have any further questions concerning the identification of these samples, please do not hesitate to call me.

Very truly yours,

James Plank
Group Leader
Rat Toxicity Department
