Caution: This email originated from outside EPA, please exercise additional caution when deciding whether to open attachments or click on provided links.

A letter was submitted yesterday that inadvertently carried over from a different recommendation, which has been corrected below, followed by the corrected message.

Entergy Louisiana, LLC (ELL) recommends that the President consider this request for a 2-year exemption for Unit 6 at the R S Nelson Plant from the revised emission standard for filterable particulate matter (fPM) which goes into effect on July 6, 2027. This requested 2-year exemption would allow R S Nelson Unit 6 to continue to provide safe, reliable, and affordable power to ELL's customers.

Additional details regarding this request are outlined below, utilizing the format requested by EPA.
