Steamship White Lead.

Put up in Kegs, 12½, 25, 50, 100 and 250.

Our Steamship White Lead is especially prepared for marine use, and is in all respects the best Lead in the market for that purpose. It will be found to be very white, of good body and very durable. It is more finely ground than other leads and consequently will be found to be much more economical to use by reason of the increased surface it will cover. It is also especially prepared to resist the destructive action of the water which tends to decompose most leads so that they soon wash off.

Price.....per lb. 5

Steamship Paint, Engine White.

Put up in 12½ and 25.

These are goods especially prepared for heated surfaces. They are ground only in paste form and are to be thinned only with Turpentine. When so used they will not turn yellow, but remain perfectly white for a long time.

Price.....per lb. 8 2

Steamship Paint, Submarine Hull.

Put up in 5 and 10.

Numbers of tests made prove that in our Submarine Hull Paint we have an article which will meet the requirements specified, and we also recommend its use for the coating of the inside of hulls, especially the parts below the water line.

One of the most important features is that it will dry readily in a very short time, thereby saving largely in time and expense to the owners.

Price.....per gal. 60
