

1 A No.

2 Q Okay. Doctor, we have heard a couple of
3 terms used by a lot of witnesses in this case.

4 The terms of chamfering and beveling.

5 Do you have an understanding as to what
6 those terms mean?

7 A That would be smoothing out the edges and,
8 in this case, when you are chamfering the shoes you
9 are smoothing out the sharp edge of the material.

10 Q So that is chamfering.

11 What is beveling then?

12 A Well, beveling would be more cutting or
13 grooving the material. It is a little more extensive
14 than chamfering would be.

15 Q By grooving, do you mean the thing that you
16 did to the brake pads?

17 A No, this would be -- my understanding,
18 beveling would be in terms of straightening it out,
19 in terms of making sure it was all the same height.

20 Q Prior to writing the protocol, or at any
21 other time during the time you conducted this test,
