

Does Your Present Heat Insulation Have All These Advantages?

Kaylo Heat Insulation is a hydrous calcium silicate—a revolutionary heat-saving material—outstanding both in performance and ease of application.

EXHIBIT

48

KAYLO PIPE INSULATION is made to simplified Dimensional Standards of thickness and diameter for easy cutting, when necessary.

1 LOW "K" FACTOR—Billions of sub-microscopic air spaces which compose the structure of Kaylo Heat Insulation give it exceptional insulating value.

2 TEMPERATURE RANGE UP TO 1200° F.—Kaylo Heat Insulation eliminates the need for combination coverings in nearly all operating conditions.

3 LONG SERVICE LIFE—Kaylo Heat Insulation remains dimensionally stable, strong and efficient over the years—although exposed to temperatures up to 1200°F.

4 INSOLUBILITY IN WATER—Even when saturated, Kaylo Heat Insulation retains about 85% of its strength. It returns to its original strength after drying.

5 HIGH STRENGTH—Breakage of Kaylo Heat Insulation is almost negligible in shipping and installation—workmen can walk on insulated equipment without causing breakage.

6 LIGHT WEIGHT—Since Kaylo Heat Insulation weighs only 11 pounds per cubic foot, it is exceptionally easy to handle and apply.

7 WIDE RANGE OF SIZES AND SHAPES—Kaylo Heat Insulation's unmatched selection of sizes and shapes reduces the number of pieces required per job.

8 EASE OF CUTTING AND FITTING—Ordinary tools of the trade are used to install Kaylo Heat Insulation. The material is non-irritating to the skin and non-toxic.

For complete details on all of the advantages of Kaylo Heat Insulation, write Dept. H-249, Owens-Illinois Glass Company, Kaylo Station, Toledo 1, Ohio.
