

**There's a better formulator and a better pigment
behind every better anti-corrosive paint.**

You supply the first.

We'll supply the second.

Oncor® M50®. The Basic Lead Silico Chromate pigment.

It's better because it adds rust-resistance to every coat. Primer. Intermediate. Finish.

It's better because you can tint it creatively. Just about any color you like.

It's better because you can use it in so many ways. In everything from automobile primers to trade sales products.

Some say it's better because it saves money—so little goes such a long way. Others say it's better because it works so well in the production run.

If you need information, we've got it. Booklets. Spec sheets. Formulations. Or specific advice. Just write National Lead Company, Room 3107, 111 Broadway, New York, N.Y. 10006.
