MESSAGE:

re: Mack Trucks

Dan Czernik called. In addition to the other tests we have been running for Mack Trucks, he would like comparative sealing data on the various materials involved. These include:

- 1) Victocon 300 special with Victopac 100 facing
- 2) Victocon 150 special with Duroid 5600 facing
- 3) R/M #25445 Teflon-Ceramic sheet

SIGNED

Also the facings for 1) & 2)

REPLY

Please conduct ASTM sealability to get some sort of comparison, although we agree this is not the best possible test.
