INTER-OFFICE COMMUNICATION

Scotts.

To: Sarge Chamberlain
cc: John Kilsheimer

From: Le Herron

Subject: LIBBY VERMICULITE
Your Memo June 12, 1978

Date: June 13, 1978

I see no reason why we should not write Grace that we do meet all requirements in safe handling so that they can remove the placards from the cars. This is subject to any comment John Kilsheimer may have to the contrary.

When doing this, Sarge, I believe we should also point out that we have not experienced improvement on air sampling due to their process improvements. As you know, they have been stressing these improvements and that we should in turn be seeing the results. I believe we should keep them informed that this is not our experience.
