Dear Sir/Madam:

In July of 2006 3M notified the EPA that preliminary data had been received from a study suggesting an effect of perfluorooctanesulfonate (PFOS) and perfluorohexanesulfonate (PFHS) on body weight, food consumption, and serum cholesterol in 15% dietary fat fed E3 Leiden transgenic mice *in vivo*. The final report for this study is enclosed.

If there are questions, or if additional information is needed, please contact me at (651-737-1374).

Sincerely,

Deanna J. Luebker, MS, PhD
