**Subject:** Re: CityLab inquiry: generators, environmental impact

Hi Chris, I told you last week that I was looking into this. We are working to meet your deadline of May 8.

Following up on this request. Is anyone from EPA able to talk about air quality around portable generators, like the kind used for food trucks, street festivals and other outdoor events?

Thanks,  
chris

Hello,

I'm a journalist with [CityLab](#) and I'm writing a story for May about the environmental impact of generators at outdoor festivals, food truck gatherings, street fairs, etc. Would someone at EPA be available to talk about the relative environmental impact of diesel, propane, and solar generators? Hopefully they could venture a guess as to the impact of all these street festivals on the environment or at least recommend someone who could.

I'd appreciate any resources you have on the topic, but most of all I'm looking for a short phone conversation with someone with expertise in the area over the next two weeks.

Let me know, please, and thanks!

Chris Bentley
