subject PULMONARY FUNCTION TESTS

date May 29, 1974

C
O
P
Y

This will confirm our phone conversation of this date in regard the pulmonary function tests that have been done twice on joint system employees, with some questionable results.

Bob McCallister of Portland and Lance Ryder of Stamford had previously advised they were studying these tests but no answers were forthcoming.

Jim Hurd has requested a copy of the letter from Dr. Amdur, who gave us his opinions of these tests. Jim advised Bob Schifferle that he, and the above mentioned, would study this problem and advise us of their proposed recommendations in regard these test results.
