670731 Experience With A Formal Reliability Program - B. G. Rich, O. A. Smith, and Lee Korte, John Deere Waterloo Tractor Works

670817 Flexibility, Economy, and Imagination with EDM - T. J. O'Connor, Pres., Easco-Sparcatron, Inc.

670818 New Concepts for ECM - V. D. Myerly, Cincinnati-Heald

680010 Use of NC at Renault for Car Body Design and Tooling - P. E. Bezier, Regie Renault

680050 Shaker/Vibration Study of Automotive Drives - E. P. Lehmann, Gleason Works

680051 Manufacturing Influences on the Noise of Transmissions - E. Beuler, Volkswagenwerk AG

*680387 Bias Angle vs. Radial Ply vs. Bias Belted Tires—Manufacturing Comparisons - A. J. Saulino, U.S. Rubber

*680487 The Net Hole Concept - K. F. Fowler, Chevrolet Motor Div., GMC

*680488 Geometric Dimensioning and Tolerancing - L. W. Foster, Honeywell

*680489 The Boundary Concept of Position Tolerance - J. V. Liggett, Kelsey Hayes

*680490 Statistical Tolerancing as it Relates to Quality Control and the Designer A. Bender, Delco-Remy Div., GMC

MATERIALS AND STRUCTURES

670005 Is Molded Plastisol Meeting Automotive Needs? - H. W. Weinberg and A. F. Reilly, Sheller Mfg.

670009 Improving Fatique Life of Connecting Rods - J R. Bailey, McCulloch

670010 Stress and Fatigue Analysis of a 2 Throw Crankshaft - D. E. Niles, Outboard Marine Corp.

670041 How Do Phosphate Coatings Reduce Wear Resistance on Moving Parts - W. R. Cavanagh, Hooker Chemical

670042 Wear of Chromium Piston Rings in Modern Automotive Engines - W. H. Charlesworth and W. L. Brown, Dana

670073 The Technique of Electron Irradiation Curing of Coatings - K. H. Morganstem, Radiation Dynamics

670074 Plastisol Coatings as Packaging Materials - Jack Panzer, Wyandotte Paint

670075 Weldable Lead Phosphatc—Its Properties and Use - L. D. Barrett, International Rustproof

670084 Plastic Fiber Optics - T. C. Hager, R. G. Brown, and B. N. Derick, du Pont

670085 Application of Plastic Fiber Optics to Automobiles - Robert Mead, Packard Electric Div., GMC

670104 Structoform Reinforced Plastic - A. J. Tiffan, R. G. Cunningham, and J. A. Waters, Sohio Chemical

670105 Quality and Economy in Glass Reinforced Plastics with Vibrin-Mat Molding Compounds - J. P. Walton, U. S. Rubber

670106 Spraypreg—A New Engineering Material - H. Stuart Alspach, Goodyear Aerospace Div.

670118 The Impact of Changing World Trade Patterns on the Supply and Demand of Automotive Metals—Aluminum - R. W. Hale, Battelle Memorial Inst.

670119 Current Patterns and Future Trends in the Supply and Use of Copper - W. S. Lyman, Copper Development Assoc.

670120 Iron and Steel - J. R. Miller, Battelle Memorial Inst.

670121 Chromium, Molybdenum, Nickel and Tungsten as Automotive Metals - C. W. Merrill, U. S. Bureau of Mines

670151 Fundamentals and Basic Techniques of Residual Stress Measurements with a Portable X-Ray Unit - R. J. Homicz, Northrop

670152 The Application of the Portable X-Ray Stress Technique at the Commercial Airplane Division of the Boeing Company - D. A. Bolstad, Boeing

670153 Using Aluminum Alloy Strain Measurements - M. S. Werkema, Martin

670154 Application of Residual Stress Measurements in Failure Analysis and Field Inspection - M. Raefsky, N. Walter, W. Lieberman, and J. Clark, Boeing

670257 Certification of the Sabreliner Safe Life Structure - C. W. King, North Amer. Avia.

670259 The Design of a Small Pressurized Aircraft Structure - P. H. Furman, Mooney Aircraft

670260 Flutter Characteristics of the Slab Tail - J. A. McKillop, Engineering Res. Assoc., Canada

670333 Use of Composite Materials in Aero Engines - J. M. S. Keen, Rolls-Royce

670335 Titanium Alloys for Advanced Compressors - R. A. Sprague, D. L. Ruckle and M. J. Donachie, United Aircraft

670336 Low Cycle Fatigue Properties of Advanced Turbine Materials - Justin Slepitis, Taylor Forge and Pipe, V. J. Mehra and J. Mogul, Curtiss-Wright

670462 The Development and Economics of Using Aluminum in Automatic Transmissions - Paul Thornburg, Ford

670463 Factors Considered When Machining Aluminum Die Castings - G. A. Carlsen, Chevrolet Motor Div., GMC

670464 Production Problems Encountered in Machining Aluminum - Bernie Caine, Buick Motor Div., GMC

670465 Metallurgical Factors Related to Machining Aluminum Castings - R. C. Lemon, ALCOA

670474 Review of Material Development for Cutting Tools - E. W. Goliber, GE

670486 A Stylist Comments on the Glare Reduction Regulations - V. M. Exner, Virgil M. Exner, Inc.

670488 Anti-Glare Finishes for Automotive Stainless Steel Trim - M. J. Johnson, W. D. Heavner, and A. E. Glubish, Allegheny Ludlum Steel

670489 Nickel Plated Finishes for Glare Reduction - J. W. Manquen, Udylite

670490 Low Gloss Finishes for Anodized Aluminum Trim - F. W. Baker, ALCOA

670491 The Application and Deposit Characteristics of Duramir-BK, A Black Chromium Plate - C. L. Fuelling, Diamond Alkali

670492 What Can Be Done with Vacuum Metallizing Coatings to Satisfy the Anti-Glare Regulations - L. A. Dickinson, BEE Chemical

670503 A Photostress Study of Spur Gear Teeth - M. G. Pottinger, Wright-Patterson AFB, and Raymond Cohen, and E. O. Stitz, Astronautical, and Engrg. Sciences, Purdue University

670504 A Study of the Effect of the Induction Hardening Vaiables on the Residual Stresses and Bending Fatigue Strength of Final Drive Gears - R. A. Cellitti, Chief Research Metallurgist, International Harvester

670708 Room Temperature and 600 F Tensile Properties of Aluminum-Silicon Casting Alloys - F. A. Badia, International Nickel

670802 New Approaches to Industrial Hygiene in Beryllium Fabrication - D. L. Hedges, North Ameri. Avia.
