Report No. 77-8-249

August 22, 1977

Microscopic examination of two (2) samples submitted.

Bondex International
Brunswick, Ohio 44212

Attn: Mr. Julius K. Nemeth

TEST REPORT

The following samples were submitted:

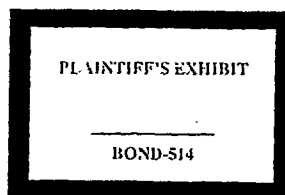

1. Attagel 40
2. Duramite

Microscopic examination of the two samples indicated that there was no fibrous material present.

A fiber is defined as a slender, elongated structure. They may be of vegetable, animal or mineral origin.

Respectfully submitted,

INDUSTRIAL TESTING LABORATORIES, INC.
